

*How to lookup EtherCore coins

1. Access <https://wallet.ethercore.org/>
2. Select Contracts tab, and then select TimeLock Contract on Select Existing Contract

The screenshot shows the EtherCore Wallet interface. The top navigation bar includes links for New Wallet, Send Ether & Tokens, Send Offline, **Contracts** (highlighted with a red circle), Check TX Status, View Wallet Info, and Help. The main heading is "Interact with Contract or Deploy Contract". Below this, there are two sections:

- Contract Address:** A text input field containing the address `0x12925c6b4ebb971c17a4f52cf902832a428cbdde`.
- ABI / JSON Interface:** A text area containing the ABI for the TimeLock Contract.

On the right side, there is a section titled "2. Select TimeLock Contract" with a dropdown menu labeled "Select Existing Contract". The dropdown menu is open, showing a list of contracts. The "TimeLock Contract" is selected and highlighted with a red circle. Below the dropdown, there is a button labeled "Access".

At the bottom, there is a section titled "Read / Write Contract" with the same contract address and a dropdown menu labeled "Select a function".

3. Select payin tab, and set lockTimeS value, for example, we will set 300 seconds as a coin lockup time.

Read / Write Contract
