

***How to connect EtherCore mainnet with Metamask**

1. Unlock your Metamask wallet
2. Select network tab and click Custom RPC

3. Add the following value to config

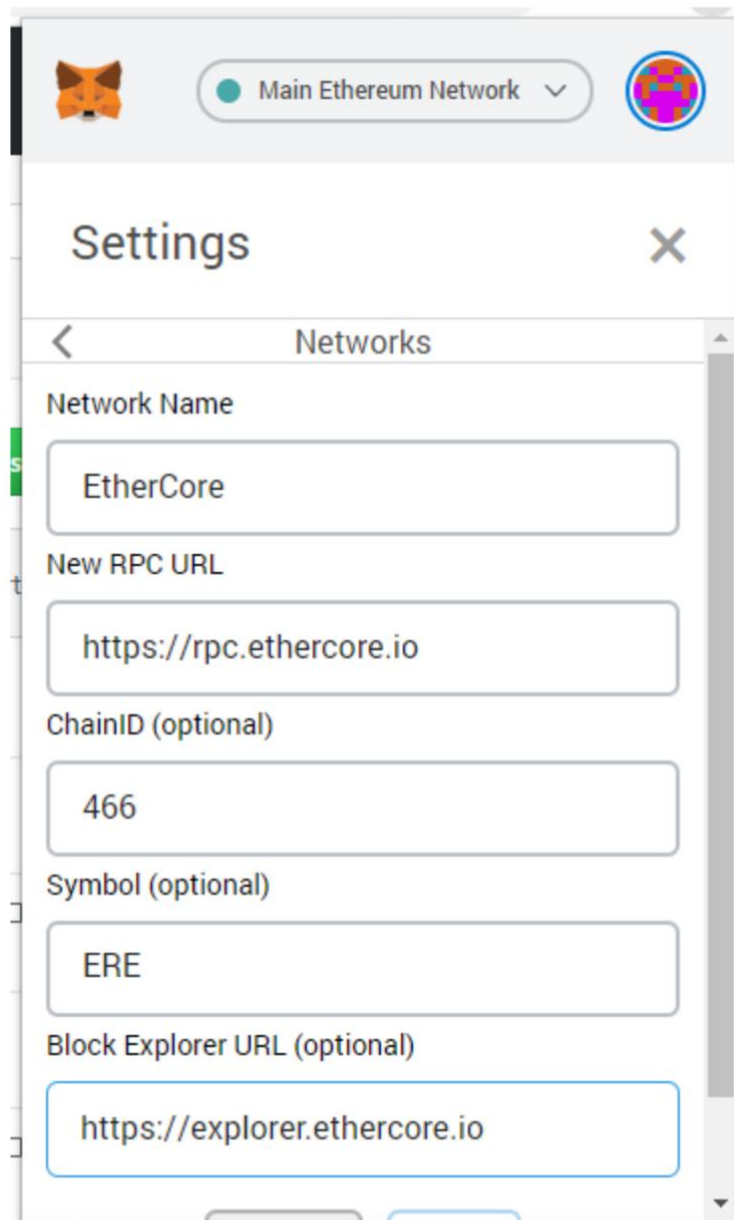

Network Name: EtherCore

New RPC URL: <https://rpc.ethercore.io>

ChainID: 466

Symbol: ERE

Block Explorer URL: <https://explorer.ethercore.io>

The screenshot shows a mobile application interface with a 'Settings' dialog open. At the top of the app, there is a fox icon, a dropdown menu set to 'Main Ethereum Network', and a globe icon. The 'Settings' dialog has a title bar with a close button. Inside, the 'Networks' section is active, showing a list of input fields for configuring a new network. The fields are filled with the following values: 'EtherCore' for Network Name, 'https://rpc.ethercore.io' for New RPC URL, '466' for ChainID (optional), 'ERE' for Symbol (optional), and 'https://explorer.ethercore.io' for Block Explorer URL (optional).

Settings

Networks

Network Name

EtherCore

New RPC URL

<https://rpc.ethercore.io>

ChainID (optional)

466

Symbol (optional)

ERE

Block Explorer URL (optional)

<https://explorer.ethercore.io>

And then click Save button

Next time you can switch network between Ethereum mainnet and EtherCore mainnet
